

## 908A Integrated Vibration Transmitter

### Applications:

This robust vibration transmitter is used to monitor the condition of important machinery. Ideal for use in harsh, noisy environments.

### Features:

- Electromagnet velocity sensor
- Aluminium, dust-proof case
- Insulated housing
- 2 or 3 line 4~20mA
- Output load resistance: 0~500Ω
- M8 screw sensor installation

### Specifications:

- Operating temperature: -20~70°C
- Power supply: 20~30Vdc
- Size: 40 x 80 mm
- Weight: 370 g

### Wiring:

### Precautions:

1. The sensor must have a close and rigid contact with the object under test. The transmitter may be installed with a magnetic base or a screw and lock washer.
2. The cable and connector can be pasted with as shield of silicone rubber after being tightened together to prevent them from coming loose.
